

# ISO SYSTEMS AND BUSINESS MANAGEMENT SERVICES

Look to **The Strategic Consulting Group**, for quality, information security and risk management ISO services.

Businesses are globally connected and need business systems built on a solid foundation of quality, information security, business continuity, environmental protection, and risk management. The ability to optimize processes, increase efficiencies and lower costs are core to the organization's competitiveness. The Strategic Consulting Group, has unparalleled knowledge of applying ISO standards for SMBs to Fortune 500 corporations and all levels of government.

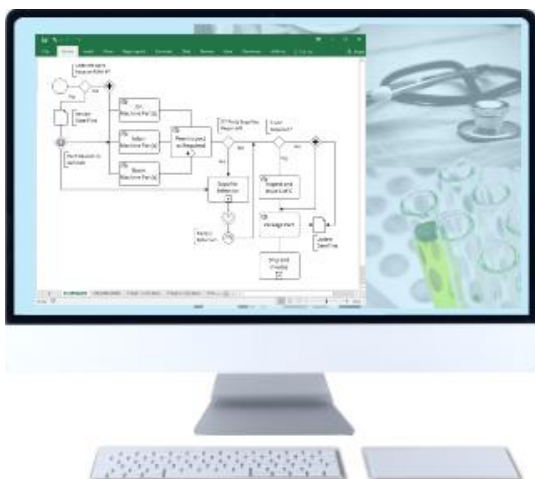

The ability to effectively document, implement, train and audit to ISO standards requires specialized skills with:

- 9001: Guidelines for Quality Management Systems
- 22301: Guidelines for Business Continuity
- 27001 and GDPR: Guidelines for Information Management Systems
- 31000: Guidelines and a framework for risk management
- 19011: Guidelines for conducting audits and system assessments

We tailor our ISO services to meet our client needs and management style.

We follow and adhere to internationally recognized standards adopted by thousands of organizations and all levels of government.

We embrace the tenets of honesty, clarity, consistency, and completeness to ensure open and effective communication between consultants and with our clients.

Get strategic, operational, and process improvements with measurable results, geared to your challenges, needs and schedule.
